IN Books which are published as Guides to Travellers, Accuracy must ever be regarded as the principal object; the Proprietor therefore deems it incumbent upon him to state the Authorities under which this ITINERARY was first published. It might, perhaps, be sufficient to say, that it was brought forward under the sanction of *His Majesty's Postmaster General*: but he cannot avail himself of such an indulgence without noticing the circumstances which procured him that very honourable patronage.

Having had it in command from the *Postmaster General* to make a Survey, under the direction of Mr. HASKER, Surveyor and Superintendant of the Mail Coaches, of all the *principal Roads* throughout the kingdom, for official purposes, the accuracy of which (*as required by an Act of Queen Anne, for all Roads measured on account of the GENERAL POST OFFICE*) is attested on the oaths of the several Surveyors employed, it was deemed to be a Work of such utility to the Public, that it ought not to be withheld; as, from the precision with which it was executed, much benefit might accrue to the Traveller; and as the distances on those Roads were planned from one stationary object to another, it would enable him to determine, beyond dispute, the exact length of his stages.

Extensive as was this Survey, it was nevertheless considered not to embrace the whole of those Roads to which the Traveller might wish occasionally to refer; therefore the Proprietor has, with great industry and care, selected from the County Surveys such other Roads as appeared to him essential, the distances on which, although not regulated by his own Survey, and, of course, not calculated from one stationary mark to another, yet he has every reason to believe are faithful, the whole being verified by the different Postmasters throughout the kingdom, and officially communicated by letter to FRANCIS FREELING, Esq. Secretary to the General Post Office, and THOMAS HASKER, Esq. Superintendant of the Mail Coaches, and by them forwarded to the Author. Through the same channel he also received a List of such Inns as supply Post Horses and Carriages (which are added at the end of each Route), Seats, &c. &c.

FIFTH EDITION.

ANXIOUS to preserve the good opinion of the Public, the Proprietor has used his utmost endeavours to correct those errors to which a publication of this description must always be liable; and he has so arranged the *Remarks which accompany the Roads, as that they and the Route to which they refer, present themselves to the eye of the reader at the same time.*

To the Population, and Number of Houses in each Town, given from the returns made to Parliament—the Time of the Mail's Arrival at and Departure from each Town—the specification of the corporate Towns, and of those at which the Assizes are held—the Course of the Rivers crossed on the Routes, and the Line of the navigable Canals, describing their length, and showing the places through which they pass—the Inns on the road which supply Post Horses and Carriages; also, *those Inns in the Metropolis whence the Mail and Stage Coaches depart (showing the Route they take by reference to the Itinerary; the Time of their Departure from London, and Arrival at their respective Inns in the Country; likewise the Time of their Departure thence, and Arrival in Town)*—several additional Cross Roads—the Circuits of the Judges—the Rates of Postage in Great Britain—with Maps of the Isle of Wight, the Environs of London, Bath, Brighton, Margate, and Cheltenham, are added Routes to upwards of NINE THOUSAND Places, lying off from the main Roads, and which will not be found in any other work of this description.

EIGHTH EDITION.

THE Author, grateful for the patronage with which the Public has honoured his Work, once more offers his grateful acknowledgments. In the present Edition he begs to observe, that several alterations have been made in the Roads; and that the Account of the Gentlemen's Seats has been thoroughly revised, and several additional ones inserted. The following IMPORTANT ADDITION is also made—a List of the PROVINCIAL STAGE COACHES, pointing out to the Traveller the most ready means of communication with every considerable town throughout the kingdom.

DIRECT ROADS.

That the Distances may correspond as nearly as possible with the Milestones on these Roads, they are reckoned from the customary standards.

At the conclusion of each Route, where the length is such as to render it useful, a *Return Route* is added, exhibiting at one view the immediate distance from stage to stage, without the trouble of subtracting; to which method of calculation the Traveller would otherwise find it necessary to resort. The reckoning on this Back Route is also continued to the *General Post Office*, for the purpose of preserving the plan of the First Edition to those who may consider it essential.

CROSS ROADS.

To this part of the Work great Additions have also been made, and several Roads introduced, which are not described in any other publication of this nature.—The INDEX to these Roads is likewise so arranged as to afford an easy and direct reference to each Route.

SEATS.

The Proprietor has to acknowledge infinite obligations to his Friends for numerous Additions and Corrections, which they have kindly communicated, and which have enabled him to extend his List of Seats, and render it as perfect as the nature of the Work

ADVERTISEMENT.

will admit; but as this part of the Publication is necessarily liable to some inaccuracies, even during its printing, he hopes that, where any errors may be perceived, they will not be imputed to negligence, as the utmost care has been taken to render the List correct; and he earnestly solicits those who may do him the honour of making this Book their travelling Companion, that they will have the goodness to transmit any additional information for the improvement of the Work; and their communications shall be carefully attended to and gratefully acknowledged. A full and complete Index to the Seats is given at the end of the Work, with particular reference to the page where they are noticed.

MAP.

The Map of England and Wales, which accompanies, has been executed with the greatest care and attention, and exhibits the whole of the Roads contained in this Work, particularly describing those on which the Mail Coaches travel.

Figures of Reference are added to the Cross Roads, corresponding with the number of the Route wherein they are described; thus affording an additional Index to those Roads, and giving facility to the Traveller in tracing his Route in every direction, and to any extent.

Surveyors employed in measuring the Roads described in this Work.

GEORGE GRETTON, *Liverpool.*

RICHARD WOLLAMS, *Shirleywich.*

JOHN BURTON, *Lancaster.*

JOSEPH SINGER, *Littletown, Devon.*

L. HEBERT, *Strand.*

The Measurements, which are taken in miles and furlongs, are arranged in columns; the first and second giving the distance from one City, Town, or Village, to the next; the third and fourth, the number of miles from the commencement of the Road.

Example.—Page 3.

ADVERTISEMENT.

Thus, the distance is given for Shooter's Hill in the third and fourth columns, eight miles one furlong; and in the continuation of the Road to Dartford you find the measurement to that place from London to be fourteen miles six furlongs.

General Directions for tracing the Roads.

Suppose you want the Road from London to Doncaster—look for the name of that place in the *Index to the Direct Roads from London*, and the figure opposite to it (351) refers to the page in which is that part of the Road containing Doncaster, though the description of the Road in which it is situated (being that from London to Carlisle and Glasgow) begins in page 343, and ends in page 360.

In describing the lesser Roads branching from the greater, the last remarkable place on the great Road, or the spot where the lesser turns off, is first given, with a reference to the page in which you will find the Road so far as to that place; and afterwards the Branch is continued: as, for instance, to find the Road from London to Weymouth, the Index refers you for Weymouth to page 84, where you find it in the following form, *viz.*

	M	F	M	F
To Dorchester, p. 56	—	—	119	6
Winterborne Monckton	2	—	121	6
Brodeway	2	7	124	5
Melcomb Regis	2	5	127	2
Weymouth	—	4	127	6

By which it appears you are referred to page 56 for this Road as far as Dorchester (the last remarkable place on the great Road); and the remainder of the Road to Weymouth is given after the above form in page 84, as directed by the Index. These References are made use of in order to prevent the numberless repetitions, which would otherwise unavoidably occur, and thereby swell the Book to an inconvenient size.

The Index to the Cross Roads, it is conceived, is so copious and explicit, as to require no further explanation than what is given at the beginning of it.

Having before observed how much he should feel obliged to those Travellers who would do him the favour to communicate notice of any Error which they may occasionally detect in this Work, it may appear intrusive again to solicit their attention; but the Proprietor hopes his anxiety will be excused, in consideration of the advantage which the Public must feel, in having a Work of this nature correct in all its parts, and that to render it so exceeds the possibility of individual exertion.—In the performance of this task, he has used his utmost endeavours to make his Book complete, and flatters himself, that in the Delineation of the Roads few Errors will be found; but it scarcely needs remark, that in giving the numerous Seats which this Work describes, some mistakes must occur, to rectify which, he takes the liberty of observing, that nothing can so effectually contribute, as the information of the intelligent Traveller, whose assistance he most particularly requests; as also that of Gentlemen of local information, to whom he would consider himself highly indebted for their communications, to which the utmost attention will be paid.

It would add to the obligation, if Gentlemen, when they communicate information, would have the goodness to sign their Name and Address, as it frequently happens that further explanation is necessary, and it would remove any doubt as to authenticity.

ROSS towards the North Pole, which have enabled him to make many very important additions and alterations: the utmost pains have been taken to render his Globes both exact and elegant, and he flatters himself that they exhibit every improvement to the present time.

TABLES, shewing the immediate Route from the Metropolis to upwards of 9,000 Places lying off from the Main Roads throughout ENGLAND and WALES.

THE following Tables are intended to shew the immediate Route from the Metropolis to those places which, lying off from the Main Road, could not be described in the body of the work. References are added shewing the Route to be taken by the Traveller, as also the place on the road nearest to that which is sought.

EXAMPLE:—Suppose you want the Road from London to Abbenhall,—refer for that place in this Table, and you will find it described 2 mls. *l* (2 miles to the left) of Longhope, which place, as arranged in the next column, will be found in page 196, and your Route will therefore be directed through Uxbridge, Beaconsfield, High Wycombe, Oxford, Witney, Northleach, Cheltenham, and Gloucester, to Longhope, where, as expressed in the Table, you turn to the left, and at about the distance of 2 miles is situate Abbenhall.

Note. In selecting the roads to which the references are made, we have considered it an accommodation to select those (when it could be done) on which stage-coaches travel—it may also be proper to observe that where the traveller may require to be forwarded by Post chaise, he must oftentimes stop short of our reference, or otherwise proceed to the next stage beyond it—as in the above example, he must either stop at Gloucester, or proceed to Ross, the next stage from Gloucester.

The direction *r* and *l* are not to be understood always to mean directly *right* and *left* of the places referred to, but right and left of the road on which you are travelling, as the places sought will in many instances lie forward, or obliquely, of the reference, in a direction thus,

in such case, we have signified the same by adding an *o* to the letters *r* and *l*.—Thus *r. o.* right oblique, *l. o.* left oblique.

Coach Directory.

INDEX OF PLACES

WHICH OCCUR IN THE
ROUTES OF THE DIFFERENT COACHES
GOING FROM THE METROPOLIS.

Places printed in the Roman Character are those through which Coaches pass in the Prosecution of their Journey to some Town more remote from the Metropolis.

The *Italic* Character denotes that there are Coaches whose Journeys terminate at the Place; the References to such Coaches are printed within Brackets []: where other Figures precede or follow those included within the Brackets, they relate to Coaches which pass through the Place.

M. following the Figure of Reference, signifies the Mail Coach.

The Numbers opposite the Name of each Place correspond with those annexed to the Coaches in the List of Inns which immediately succeeds this Index.

EXAMPLE.

Supposing a Conveyance to Abberford to be wanted—see in this Index the Name of Abberford, and the Numbers opposite, 206, 488;—turn to either of these Numbers in the List of Inns, where will be found the Coach which passes through that Place; viz. [206], Aberdeen and Edinburgh Coach, Bull and Mouth Inn; &c. &c.

CARY'S IMPROVED MAP OF ENGLAND.

THE Publisher commenced the Undertaking from a conviction that a Map of England upon a scale of sufficient magnitude to mark down the situation of Gentlemen's Seats through the country, would be a desideratum in English Geography; it is his intention to distinguish them in a prominent manner from the farm-houses and inferior buildings. To do this accurately, he feels that he must have recourse to local residents, and will therefore be highly obliged, if favoured with the names of Gentlemen who would have the goodness to revise the objects delineated in their immediate neighbourhood, as it is his anxious wish to render the orthography of the Map as correct as possible, which can only be effected by the assistance of Gentlemen who have local knowledge of the country. It has long been a subject of complaint, that in the County Atlases the country is represented in a disjointed and unconnected form, the scale being generally regulated by the size of the paper, and not by that of the county; Rutland, for instance, being upon as large a sheet as Devonshire, conveying to the eye a false impression of their relative magnitudes; whilst, from the variety of scales, and the imperfect manner in which the confines are laid down, it is scarcely possible to trace the connexion between adjoining counties. Sensible of these difficulties, to which County Maps are subject, the Author has been induced to commence this Work, and which is already in a forward state. The Map will be founded upon the trigonometrical surveys made by command of the Board of Ordnance, by which the position of every place will be marked with accuracy.

The situation of Towns, Villages, Hamlets, and the Gentlemen's Seats, will be faithfully delineated, as well as the Roman Roads and Stations, and every other object tending to illustrate either the history or the antiquities of the country; at the same time great care will be taken to avoid confusion in the arrangement of the objects. The whole of the Turnpike Roads will be marked down, as well as the Parish Roads; distinguishing the Carriage Roads from the Bye Roads, which has never yet been attempted in any Map of England, and which the Publisher flatters himself will be found of considerable importance to the Traveller. The courses of the Canals and Rivers, as well as the navigable extent of the latter, will be shown. The unnecessary degree of blackness which prevails in our best Maps, confounds the objects, and makes it extremely difficult to read the names or distinguish the features of the country. The Publisher feels fully confident, that, by the plan he has adopted, he will be enabled completely to obviate this objection, and that the high grounds, with their proportionate expansion, will be distinctly shown, without injuring the perspicuity of the Map; and that dazzling effect which prevents the eye from readily catching the object sought, will be most carefully guarded against.

The map is laid down to a scale of Two Miles to an Inch, and will consist of Sixty-three Sheets, which may be mounted in any number of sections, or bound up to form a handsome volume, the size of Cary's Universal Atlas; and to render it more convenient in this form, portions of the Map are repeated, so that the connexion may be more readily traced. The size of each sheet will be 24 inches by 19 inches.

The Map will be published in 14 Parts: the price of each Part will be One Guinea, or 5*s.* 6*d.* for a single Sheet.

Those Gentlemen who intend to honour the Work with their patronage, and wish to obtain early impressions, are requested to transmit their names either through their Booksellers or to the Publisher, JOHN CARY, 181, Strand, as the copies will be delivered according to the date of the order.

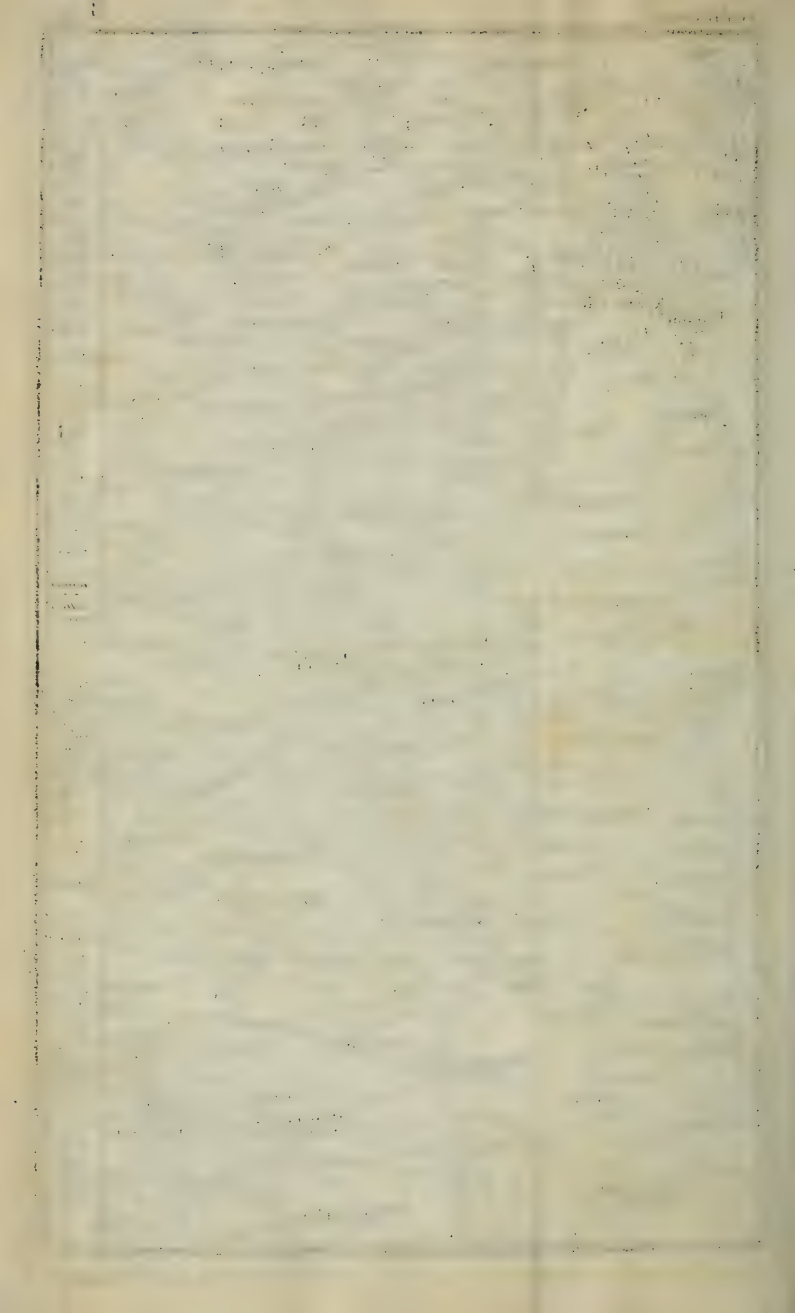

Part the First, containing the whole of Cornwall and part of Devonshire, will be published early in the ensuing Autumn.

From Southampton to Cowes, Isle of Wight, the Distance is about Fifteen Miles. Two Vessels sail every Morning, and return in the Afternoon. From Portsmouth to Ryde is about Seven Miles, with similar Conveyances; and Wherries may be procured from either Place at all Hours.

As the chief Object of the Traveller in the Island is Pleasure, we have endeavoured to point out a few Routes in which the most striking and picturesque Spots may be visited in the shortest possible Time. We shall commence from Newport, as the most central Point, where Accommodation and Conveyances of every Description may be the most readily procured. These Routes are inserted merely to give an Idea of what may be accomplished;—but the Days of Midsummer will not be found too long for any of them.

Cowes and Ryde are much frequented during the Summer Months, and Excursions from either may be made and varied at Pleasure. The Traveller has only Occasion to keep in Mind the Places where Accommodation and Refreshment can be procured.

INNS. Newport and Ryde, as p. 77.

When it is High Water at *Newport*, the *Medina* is seen to Advantage on the Road to *Wotton Bridge*.

Wotton Bridge, a little before, on r. Fern Hill, built by the late Sir Thos. Orde, when Governor of the Island; now — Saunders, Esq.

At *Wotton Bridge*, on r. Kite Hill, covered with Ivy, Mrs. Popham; and about 1½ M. beyond, on l. is *Quarr Abbey*, of which little remains ex-

cept its Walls, inclosing about 40 Acres: the Woods, though small, with those of Nunwell and a few adjacent ones, are almost the only Remains of Timber in the Island, which at one Period it seems to have produced in Abundance.

Binstead Parsonage and Mrs. Fleming's Cottage are interesting, particularly the Walk to the Shore, where the Oaks literally spring from the Ocean.

Ryde has of late been very much frequented, and the following Noblemen and Gentlemen have added much to its Populousness by building, viz. Earl Spencer, the Marquis of Buckingham, G. Player, Esq. &c. The Pier, which suffered so much from a severe Gale in March 1818, is now completely restored.

From *Ryde*, on l. are Apley, Captain Hutt; St. John's, E. Simeon, Esq.; Fairy Hill, the late Rev. C. Glynn; and Sea Grove, — Smith, Esq.

At the *Priory*, late Sir Nash Grose—now Wm. Anville, Esq.: most of the exotic Plants flourish in the open Air, but the Grounds are now no longer open to the Public.

Brading and *Ashey Downs* command extensive Views; on the latter is a Sea Mark for Ships entering Spithead.

THIRD, or SOUTHERN TOUR.

This is the most picturesque and beautiful of the Whole, embracing that Part of the Island called the Undercliff.

At *Bonchurch* the first Approach to the Undercliff: the Cottages of *Hen. Grimes, Esq.*; — *Coffin, Esq.*; *W. Hadfield, Esq.*; and *St. Boniface Cottage* (late *Col. Hill*, now *John Audrey, Esq.*), are singularly romantic.

At *Ventnor* the *New Inn*, where tolerable Accommodation may be had. The little Bay, with the small Rill of Water and the Shore, will not prove uninteresting.

Steephill, the Seat of the *Earl of Dyssart*, is worth Notice; as well as a Waterfall on the other Side of the Road, and the Path to the Shore.

At *Saint Lawrence*, the diminutive Church; the varied Character of the Cliffs; and the *Hon. C. A. Pelham's Cottage* (built by the late *Sir R. Worsley*, who, many Years since, formed a Vineyard, at great Expense, the Remains of which

are still in Existence), deserve Attention: on *l. Mirables*, a romantic Spot, *Mrs. Arnold*; and *Orchard Cottage*, *Sir W. B. Gordon, Bt.* on *r. Beauchamp Cottage*, *Mrs. Bennett*; and on *l. Hodes*, *James Vine, Esq.*

At *Niton*, near the *Sand Rock Hotel*, *West Cliff*, *Robert Holford, Esq.*; and *Mount Cleaves*, *Joseph Kirkpatrick, Esq.* At *Niton* the Parsonage, *Rev. John Barwis*.

Travellers will find tolerable Accommodation for sleeping at the *Sand Rock Hotel*, or *White Lion*, and on the following Morning may visit the *Sand Rock Spring*, an aluminous Chalybeate of extraordinary Strength; *Black Gang Chine*; *St. Catherine's Hill*; &c.

Cheltenham, near, at Southam, a Seat of the ancient Family of Delabere.

Cheltenham is agreeably situated in the rich Vale of Gloucester, and has of late Years considerably increased, owing to the Salubrity of its Waters, which are considered highly efficacious in bilious Complaints. The Season now begins in March and terminates the latter End of November. The Baths are upon an extensive Scale, and afford every Convenience to the Invalid. The Promenades and Well Walks are justly celebrated, and frequented by very elegant Company. The Montpelier Walks and Rides command a fine View of the Town and adjacent Country, and are tastefully planted. The New Sherborne Spa has been recently opened, and adorned with the most beautiful Shrubs. The Pump Room is an elegant Building, and much admired, from the Chasteness of its Proportions:

over the Centre is a Dome supporting a colossal Statue of the Goddess of Health. The new Assembly Rooms are upon a magnificent Scale, containing a noble Ball Room, upwards of 80 Feet in Length, and a spacious Suite of Rooms, richly ornamented.

Stratford on Avon:—This Town is particularly celebrated as the Birthplace of Shakspeare, who died in 1616, and has a neat Monument in the Church. The noted Mulberry-tree which grew in the Gardens of the Author was destroyed by a Successor, and sold to a Carpenter, who ingeniously worked it into various Ornaments and Trinkets. Here, in Sept. 1769, was the first Commemoration of Shakspeare's Jubilee, when an Amphitheatre was erected on the Plan of Ranelagh, for the Reception of its Visitors. It lasted three Days, during which Time every Species of Entertainment was exhibited; such as Concerts, Oratorios, Pageants, Fireworks, Illuminations, &c. In the Guildhall is a large Room, called Shakspeare's Hall, in which are two excellent Paintings of Shakspeare and Garrick. The Church is a noble Building, with a lofty Spire.

The *Stratford on Avon Canal* commences at Stratford; has a Branch about 4 M. from it, which goes to Binton, passes near Henley in Arden to Lapworth, where a Cut unites it with the Birmingham Navigations; thence to Hockley (where a Branch goes to Tamworth) and King's Norton, where it unites with the Worcester & Birmingham Canal.

This Town is not incorporated, and is only governed by two Constables and two Bailiffs; it has an elegant new Theatre, &c.

Birmingham Canal. This Navigation commences at the Town of Birmingham; its Course from thence is by Smithwick, Oldbury (near which it has a Branch to Wednesbury), Tipton Green (where it is joined by the Old Dudley Extension), Bilston, near to Wolverhampton (where it unites with the Wyrley & Essington Canal), to Atherley, at which Place it joins the Staffordshire and Worcestershire Canal.—Length of the direct Line 22¾ M.; Branches, 5½ M. 1½ M. from *Birmingham*, on r. Fras. Egginton, Esq.

Soho. Here are the famous Works belonging to Mr. Bolton, forming one of the most extensive Manufactories in the Kingdom, as well for the Number of Hands it employs, as for the Variety of Articles it produces. It consists of four Squares, with connecting Ranges of Shops, like Streets, capable of employing 1000 Workmen, in all the Varieties of the Button, Buckle, plated or Argent Mola, Steel, and Trinket Manufactory.

Ludlow is a very ancient Town, sends 2 Members to Parliament, and is governed by 2 Bailiffs (who are the returning Officers), 12 Aldermen, and 24 Common Councilmen. The Church is a fine venerable Structure, built of Stone, in the Gothic Style, with large and lofty Windows of painted Glass; it has a high Spire with 8 Bells, and a handsome Organ, the Gift of William Henry, Earl of Powis; and a Number of antique Monuments and Inscriptions, particularly one relating to Prince Arthur, Brother to Henry VIII. whose Bowels were deposited here. The Castle, standing at the west End of the Town, is supposed to have been built by Roger de Montgomery, Earl of Shrewsbury, in the Reign of Henry I.; but he rebelling against his Sovereign; it

was forfeited to the Crown. Various Possessors appear to have held and been deprived of Ludlow Castle, till the Reign of Henry VI. when Richard Plantagenet, Duke of York, here set up his Standard; but being killed at the Battle of Wakefield, it was seized by the King's Forces, and dismantled. Soon after this his Son Edward got Possession of it, and restored the Fortress. Comus was first performed here during the Earl of Bridgewater's Presidency, principally by His Lordship's Sons and Daughters. All the once royal Rooms of State now lie open, the whole being ruinous, and covered with Ivy. Its Situation is beautiful, and the Battlements are of great Height and Thickness, with Towers at convenient Distances.

At the Vinals, near *Ludlow*, is seen a most beautiful Prospect.

Court House, on l. is Mellington, Col. Browne.

Montgomery, near, on r. is Lymore Lodge, Earl of Powis.

Montgomery is situated within 2 M. of the Severn, and was formerly surrounded with Walls. The Castle stands on an Eminence north of the Town, and appears to have been a very stately Building; little of it now remains. On a Hill near the Castle is a stupendous British Post; the Approach is guarded by 4 Ditches, having two or three Entrances toward the principal Work.

In this Church is a beautiful Monument to Sir Dudley Ryder, who died in 1756. The Borough is governed by an Alderman, Recorder, 12 common Burgesses, a Coroner, an Escheator, 12 Second Men, who are the Common Council, and 6 Constables to attend the Court.

Newark: this Town was incorporated by Charles II. in Gratitude for its Loyalty to his Father, who granted it the Privilege of sending Members to Parliament. It is governed by a Mayor and 12 Aldermen. The Town Hall is a magnificent Stone Building. The Church, esteemed one of the finest in the Kingdom, was erected by Henry IV. Of its Castle there now remain only some of the Walls. The Town is neat; and the Market-place is extremely handsome. In consequence of the many Inundations from the River, which often rendered the Town impassable, a new Turnpike Road was made about the Year 1770, and raised so high upon Arches, as to be passed with Safety in the greatest Floods: near the Town is a Bridge, for the same Purpose, made mostly upon dry Land.

Doncaster is seated on the R. Don, over which it has two Bridges. The Parish Church is a very ancient Structure; its Steeple is a Piece of excellent Workmanship: in the Church is an Epitaph dated 1597, to the Memory of one Rob. Byrks, who gave Rossington Wood to the Poor of the Parish. Its Castle and the whole Town were destroyed by Fire in 759; the former was never afterwards rebuilt. In the Reign of Henry III. a Convent was founded here, and an Hospital for Lepers. The Situation of the Town is remarkably pleasant. The Mansion House of *Doncaster* is a very spacious Stone Building. It has a handsome Theatre and Town Hall; also a free Grammar School, Alms House, and a public Dispensary. At the north End of Freres Bridge was a House of White Friars; near it, another of Grey Friars. The Remains of a Roman Highway are still visible here. The Town is governed by a Mayor, Recorder, and Common Council, and formerly sent Members to Parliament.

built: in the Centre of the Town is a Cross or Obelisk, 12 Feet high. Many Roman Coins have been found in this Place, and in a Field near the Bridge are four large Stones, called the Devil's Arrows, supposed to have been placed there by the Romans, to mark the Roads. It sends 2 Members to Parliament.

Leeming, $1\frac{1}{2}$ M. beyond, on r. Leases Hall, Mrs. Ardens.

About 4 M. from *Leeming*, on the l. Hornby Castle, Duke of Leeds.

Catterick is a Place of great Antiquity: its ancient Name, Catturacton, seems to have been derived from a Cataract or Waterfall; near it is the R. Swale, over which it has a Bridge, where also one of the Roman Roads crosses the River: on its Banks are still the Foundations of an ancient Castle; and many Roman Coins and Urns have been dug up here.

On the l. of *Catterick*, Brough Hall, Sir Henry Lawson, Bart.

Greta Bridge, beyond, on r. Rokeby Park, J. Bacon Sawrey Morritt, Esq.

Brough is situated about 2 M. from the R. Eden; it has a neat Church a little Way from the Town, the Pulpit of which is cut out of one entire Stone: near the Church, on a Hill, are the Ruins of an ancient Castle, belonging to the Earl of Thanet; Part of the Tower was standing till 1792, when it mostly fell down; on digging near the Ruins an Urn full of Roman Coins was found, from which it appears to have been built in the Time of the Romans. On the Left of the Castle the Prospect is closed by a Range of craggy Mountains, over the Tops of which Shrubs and Trees are promiscuously scattered: to the r. is an extensive fertile Plain; and behind, the lofty Promontory of Wildmore Fell lifts its Brow, and terminates the Prospect.

Appleby is almost surrounded by the R. Eden: it was a Roman Station called Aballaba, and had a military Way crossing the Country here. The Assizes are held in the Town Hall, and the Judges lodge in the Castle, an ancient Building at the End of the principal Street, belonging to the Earl of Thanet. It is a Borough Town, and sends two Members to Parliament. It has a Gaol, Town Hall, Charity School, Free School (endowed with a Salary of 120*l.* a Year), and an Hospital for a Governess and 12 Widows. This Town was taken by Surprise by William King of Scotland, but recovered by King John; and Henry II. granted it Privileges equal to the City of York. In the Reigns of Hen. II. and Richard II. it was set on Fire by the Scots; and in 1598 it suffered greatly by Pestilence, since which Time it has never recovered its original Extent.

At *Appleby*, Appleby Castle, Earl of Thanet; and Rev. John Moore.

Lowther Bridge, on r. is Brougham Hall, H. Brougham, Esq.

GREAT AND DIRECT ROADS MEASURED FROM SHOREDITCH CHURCH.

The Measurement as far as the Wheatsheaf Inn at Alconbury Hill (see p. 344) is reckoned from Hicks's Hall Standard, as well as from the Shoreditch Church Standard; the first going by Barnet, and described in Pages 343, 344; the latter as follows, by Ware, which is 4 M. 1 F. nearer than the Barnet Road; on which Account (as the Milestones after Alconbury Hill reckon from Hicks's Hall Standard) the Distances marked on this Road will no longer correspond with the Milestones; and all Roads given as Branches from the Road we are now about to describe, will consequently be much nearer than if taken from Hicks's Hall Standard.

Huntingdon is situated near the *R. Ouse*, over which it has a *Free-stone Bridge*, of six Arches. From its ancient convenient Neighbourhood for Hunting, it is supposed to have derived its Name — *Hunton Down*. Near the Church of *St. Mary* was anciently a Priory of Black Canons. On an Eminence near the Town stood a Castle, erected by *Edward the Elder*, and enlarged by *David the First of Scotland*, Earl of *Huntingdon*. The Town is recorded to have formerly had 15 Parish Churches, but now there are only two, in one of which is an ancient Steeple. It chiefly consists of one principal Street, and is well paved; during the Winter it is lighted. The Town Hall, in which the Assizes are held, is a commodious and neat Building, standing on one Side of a large Square. Here is also a good Free and Grammar School. *Huntingdon* is governed by a Mayor, 12 Aldermen, and a Common Council. It sends 2 Members to Parliament.

South Otterington, about $\frac{1}{4}$ M. on l. of, *Newby Wiske*, Wm. Revely, Esq.

Between *South* and *North Otterington*, on l. *Sobergate*, Rob. Hutton, Esq.

North Allerton consists principally of one Street, of about $\frac{1}{2}$ M. long. The Church is a Gothic Structure, built in the Form of a Cross, and contains several handsome Monuments. It has a Prison erected on Mr. Howard's Plan, containing 30 Cells, with 4 strong ones for capital Offenders, and a Place for Correction and Labour. Here formerly was an ancient Castle, which was seized and destroyed by *Henry II.* A Convent for Cistercian Monks was founded here by *Edward I.* but no Remains are extant. The whole of the Manor has been subject to the Bishop of *Durham* from the Time of *William Rufus*. He appoints a Bailiff for Life, who presides at the Election for Members of Parliament, who are chosen by the Housekeepers that pay Scot and Lot. The Battle of the Standard, between the English and Scots, in 1138, was fought near this Place: the Spot on which it took place retains the Name of *Standard Hill*; and some Caverns near it are supposed to have been the Places where the Scots were buried. *Lovesome Hill*, about 1 M. from, on l. is *Hutton Bonville Hall*, Anthony *Hammond*, Esq.

The Situation of the Cathedral is extremely grand, the Building stretching along the Crown of an Eminence 80 Feet perpendicular from the Surface of the River which washes its Base: before it is a large open Area, called the Palace Green, on the north Side of which stands the Castle, first erected by William the Conqueror; it formerly contained four Tiers of Apartments, and is now the Town Palace of the Bishop of Durham. A BRIEF ACCOUNT

OF

Bath, Bristol, Cambridge, Canterbury, Dover, and Oxford.

BATH,

A City in the Hundred of Bathforum, Somerset, is governed by a Mayor, 8 Aldermen, and 24 Common Councilmen, and sends 2 Members to Parliament, which are chosen by the Corporation; and, joined with Wells, forms a Bishopric, called the Diocese of Bath and Wells: it contains 4 Parishes, viz. St. James, St. Michael, the Abbey Church (or St. Peter and St. Paul, Walcot), and Christchurch; and according to the Returns made in 1811, it has 4279 Houses, and contains 31,496 Inhabitants.

It is famous for its medicinal Springs, which are highly serviceable in bilious Complaints, as well as in nervous, paralytic, rheumatic, and gouty Disorders: their first Discovery appears to have been by the Romans, in the Year 44. The Baths consist of the King's, the Queen's, the Cross, the Hot, the Corporation, and the Duke of Kingston's. At the King's Bath is a handsome Pump Room, where the Company drink the Waters in the Morning, having an excellent Band of Music; the Bath, a large Basin of 65 Feet by 40, contains rather more than 346 Tons of Water, when filled to its usual Height. Two commodious Rooms are connected with this Bath, fitted up with Pumps and Pipes to direct the hot Water to any particular Part of the Body. The Queen's Bath, which is attached to the King's, forms a Square of 25 Feet, and is furnished with the same Conveniences. The Cross Bath is of a triangular Form, and has a small neat Pump Room attached to it. The usual Time of Bathing in the King's Bath and Cross Bath is between Six and Nine in the Morning. The Seasons are the Spring and Fall. The Hot Bath stands about 40 Yards S. W. of the King's, and is so called from the superior Heat of its Waters, which rise to 117° of Fahrenheit.

In 1755 the Abbey House or Priory (belonging to the Duke of Kingston)

was pulled down; and in digging, the Workmen discovered, about 20 Feet below the Surface of the Earth, the Remains of a Roman Bath and Sudatories, with Floors suspended on Pillars, and surrounded with tubulated Bricks, for conveying the Heat and Vapours. The Sewer which carried the waste Water into the River was entire. The Duke, having cleared the Spring and the Sewer, erected several convenient Baths upon the Spot, where Invalids are accommodated at all Hours of the Day or Night.

Here is a noble Infirmary or general Hospital for the Sick and Lame from all Parts of the Kingdom. It is 100 Feet in Front, and 90 in Depth; and was built in 1738, at the Expense of Wm. Montagu, afterwards Earl of Bath. Most of the new Buildings, and by far the largest and finest Part of the City, are without the Walls. The Stranger should visit Queen Square, the Circus, North and South Parades, the Royal Crescent, St. James's Square, Lansdown Crescent, Catherine Place, Rivers Street, the Abbey Church, and the Assembly Rooms, all of which are particularly deserving his Attention.

BRISTOL.

The City of Bristol is governed by a Mayor, 12 Aldermen, 2 Sheriffs, and 28 Common Council, a Town Clerk, and Deputy Town Clerk, Chamberlain, Vice Chamberlain, Under Sheriff, &c. City Marshal, and other inferior Officers. It was erected into a Bishopric by Henry VIII. contains 17 Parishes; and, besides the Cathedral, 17 Churches and 5 Chapels, within the City; and 2 Churches and 1 Chapel in the Suburbs. It sends 2 Members to Parliament; and by a Charter, granted by Q. Elizabeth, every Man that marries a Daughter of a Citizen of Bristol becomes free of the City, and is qualified to vote for its Representatives in Parliament.

The Cathedral was founded in 1140; it is not of large Dimensions, but

has many Gothic Beauties: it is adorned with painted Windows and several handsome Monuments, particularly that of Mrs. Draper, the celebrated Eliza of Sterne. To the West of the Church is a most beautiful Gateway, ornamented with Statues. The Church of St. Mary's Redcliffe is considered one of the finest in the Kingdom; in it are two monumental Statues of its Founder, Wm. Canninge, and another of Sir Wm. Penn, Father of the famous Quaker.

The Quay is one of the most commodious in Europe.

In King Street there is a very elegant Theatre; and the City Library is a handsome Stone Building. There are 13 City Companies, some of whom have neat Halls.

In College Green is a stately high Cross, with the Statues of several Kings round it. The Hot Well is about $1\frac{1}{2}$ M. west of the City, close by the Avon, in the County of Gloucester, at the Bottom of stupendous Precipices (St. Vincent's Rocks), out of which the Spring rises: and above is the delightful Village of Clifton.

CAMBRIDGE

Is governed by a Mayor, High Steward, Recorder, 13 Aldermen, and 24 Common Councilmen, a Town Clerk, &c. The Police is governed jointly by the University and Corporation, the Vice-chancellor being always a Magistrate by virtue of his Office. The University, not inferior to any in the World, was first founded in the Year 630, by Sigebert, King of the East Angles; but the Colleges were not begun to be built or endowed till the Reign of Edward I. It now consists of 13 Colleges, and 4 Halls with equal Privileges with the Colleges, viz.

St. Peter's College, the first on entering the Town from London, and the most ancient, was founded in 1257. It consists of 2 Courts, separated by a Cloister and Gallery. The largest is 144 Feet long, and 84 broad. The lesser Court is divided by the Chapel, a fine old Building.

Corpus Christi, founded in 1350,

has a mean Appearance, but contains a very valuable and curious Collection of Manuscripts.

King's College, founded in 1441, by Hen. VI. was not finished till the Reign of Henry VIII. The previous Building resembles a decayed Monastery; but the new one is very magnificent, near 300 Feet long. The Chapel is one of the finest Pieces of Gothic Architecture in the World, 304 Feet long, 73 broad on the Outside, and 91 high, and not a single Pillar to sustain its ponderous Roofs, of which it has two; the first of Stone, most curiously carved; the other of Wood, covered with Lead.

Queen's College, which stands near the River, south of King's, founded in 1448, consists of two Courts, with a fine Grove and Gardens on both Sides of the River, connected by two wooden Bridges. It was begun by Margaret of Anjou, Wife of Henry VI. and finished by Elizabeth Grey, Queen of Edward IV.

Jesus College, at the east End of the Town, was originally a Benedictine Convent, and converted to its present Use in 1576.

Christ's College, opposite St. Andrew's Church, was founded in 1505, by Margaret, Mother of Henry VII. —an old and beautiful Structure.

St. John's College was founded by the same Lady in 1509, on the Site of a dissolved Priory.

Magdalen College, founded, in 1519, by Edward Stafford, Duke of Buckingham.

Caius and Gonvil College, founded, 1348, by Edward Gonvil; and augmented, 1557, by Doctor Caius. It stands near the Middle of the Town, north of the Senate House.

Trinity College, founded in 1546, by Henry VIII. on the Site of two other Colleges, stands east of the River. It contains two large Quadrangles, and has two noble Entrances; and on the north Side a Chapel, 204 Feet long, 34 broad, and 44 high. Here is a beautiful Statue of Sir Isaac Newton, who was a Student of the College. The Hall is about 100 Feet long and

50 high. The inner Court is esteemed the finest in the University. It has an elegant Cloister of Stone Pillars. On the West is the Library, an elegant Structure, 190 Feet long, 40 broad, and 38 high within. Its Entrance is by a Staircase of black Marble; and the Walls are inlaid with ancient Roman Monuments. The south End has a beautiful painted Window, of His present Majesty in his Robes. This Building was erected by Sir Christopher Wren, at the Expense of £20,000.

Emanuel College, at the S. E. End of the Town, founded, in 1584, by Sir Wm. Mildmay, was built on the Site of a Dominican Convent.

Sydney Sussex College was founded in 1598, by Lady Frances Radcliffe, Countess of Sussex. Its Hall is elegant; but the Chapel is only remarkable for standing North and South, as the others do East and West.

Clare Hall, founded in 1326, by Richard Baden, Chancellor of the University; but, being burnt, was rebuilt in 1342, to which has been added a new Chapel.

Pembroke Hall, near St. Peter's College, founded in 1343, by Mary, third Wife of the Earl of Pembroke, consists of two Courts, and has an elegant Chapel built by Sir Christopher Wren.

Trinity Hall, founded in 1350, by Bateman, Bishop of Norwich, is a small but neat Fabric.

Catharine Hall was founded in 1475, by Robert Woodlark, Provost of Arms; its Front is the most extensive and regular in the University.

Downing College, now building, was founded 22d September 1800, by Sir Geo. Downing, of Gamlingay Park, in Cambridgeshire. The first Stone of this College was laid on the 18th of May 1807. At present but a small Portion of the Building is erected, to which is allotted a Piece of Ground of nearly 30 Acres. It will consist of a Master, 2 Professors, one of the Laws of England and one of Medicine, 16 Fellows, only 2 of whom are to be clerical, and 6 Scholars. — For further Particulars of this Foundation

see Deighton's Cambridge University Calendar.

The Senate House of the University is an elegant Building, of the Corinthian Order. North of the Philosophy School is the Repository of Dr. Woodward's extraneous Fossils, Ores, Shells, &c. At the Corner of this Building is an elegant geometrical Stone Staircase, leading to the old Library, which opens into two other Rooms, containing 30,000 Volumes, presented by George I.

In the Market Place, fronting the Shire Hall, stands Hobson's Conduit, always supplied with running Water. This was the Gift of the celebrated Hobson, the Carrier in the Reign of James I. who gave rise to the proverbial Expression of "Hobson's Choice, this or none," by letting out Horses to the Students in such Rotation, that they had an equal Share of Rest and Work, by resolutely refusing to let any other than that which stood next the Door.

CANTERBURY,

The Capital of the County of Kent, is the Archbishop's See of all England, and contains 16 Parishes. The Britons named it *Caer Kent*; that is, the City of Kent. It is called the City and County of the City of Canterbury, governed by a Mayor, Recorder, 12 Aldermen, 24 Common Councilmen, with a Sheriff and Coroner, and 4 Serjeants at Mace.

The Magistrates have Authority to try capital Offences within their Liberty, the Mayor sitting as Judge, assisted by the Recorder, who pronounces the Sentence.

The Cathedral has several Times been destroyed by Fire; the present Structure was built about the Year 1174, but not entirely completed till the Reign of Hen. V. Kings, Princes, Cardinals, and Bishops, are buried in it. During the great Rebellion it suffered much; Cromwell made a Stable of it for his Dragoons; but after the Restoration it was repaired. The Body of the Church measures 178 Feet from the western Door to the

Choir Steps; the Breadth, including the Aisles, 71 Feet; and the vaulted Roof 80 Feet. The Choir is the most spacious of any in the Kingdom, being 180 Feet in Length from the western Door to the Altar. The Altar-piece was designed by Sir James Burrough, Master of Caius College, Cambridge; and the great stained Window is the most beautiful of the Kind in England. Behind the Altar is the beautiful Chapel of the Holy Trinity, in the Middle of which stood the Shrine of Thomas à Becket; Part of the Flat is curiously inlaid with mosaic Work, and contains the episcopal Chair, composed of three Pieces of grey Marble. In the Mint Yard, within the Precincts of this Church, is a public Grammar School, founded by Henry VIII. Over Westgate is the City Prison; and in Saint Dunstan's Street Without is the Prison for the eastern Part of Kent; where also the Jews have a Synagogue. Canterbury has sent Members to Parliament ever since the Reign of Edward I. Dunge Hill, at the End of the Town, is now converted into the City Mall; it forms a most beautiful Terrace, planted and made at the Expense of the late Alderman Simmons, of Canterbury.

DOVER

Was formerly surrounded with a Wall, and was incorporated by Edward the Confessor, by the Style of a Mayor and Commonalty. The Townsmen were called Burgesses, from among whom the Mayor chose Jurats or Assistants, Officers common to all the Cinque Ports.

It was formerly divided into 21 Wards, but they are now reduced to 13.

The Mayor is annually chosen on the 8th of September, and is Coroner for the Town and its Members, Faversham and Folkestone. The Town Hall is ornamented with several good Portraits. There are also a neat Assembly Room and a Theatre.

Dover is celebrated in History as a Place of the greatest Importance, ever since the Norman Conquest; and has often been called the Lock and Key

of the whole Realm. Its ancient Castle is by some supposed to have been built by Julius Cæsar; others imagine that Claudius was the Founder. Henry II. about 1153, is said to have enclosed it with a new Wall. The present Entrance is on the south Side of the main Tower, by a grand Flight of Steps round the eastern Side to the third Story, or the Governor's Apartments. These Steps were secured by three strong Gates, at each of which were a Chamber or Guard Room, and a Dungeon for Prisoners, in which several Persons of Distinction have been confined at different Times, but now used only for disorderly Soldiers. Without the Duke of Suffolk's Gate are commodious Barracks, and deep Wells which supply the Garrison with Water.

The Names of the Towers in the exterior Walls of the Castle, beginning at the Cliff near the Town, are Canon's or Monk's Gate, where is a strong Battery; Rokesley Tower; Chilham, or Chaldescote Tower; Hurst Tower; Say Tower; Gatton Tower; Peverell; Beauchamp, or Marshall's Tower; Port Gastling, or Maress Tower; Fines, or Newgate; Clopstone Tower; Godsfoe Tower; Craville, or the Earl of Norfolk's Tower; Saint John's Tower; Avaranches, or Maunsell's Tower; Veville, or Pincester's Tower; Earl Godwin's Tower; and Ashetisfordian Tower. Near the Edge of the Cliff is a beautiful Piece of Brass Ordnance, 24 Feet long, cast at Utrecht in 1544, called Queen Anne's Pocket Pistol, finely ornamented with Figures in Bas Relief: it was a Present from the States of Holland to the Queen, and is said to be capable of carrying a 12-pound Shot to the Distance of 7 Miles.

OXFORD.

The City of Oxford is seated at the Confluence of the Rivers Isis and Cherwell; and its Beauty, in magnificent Buildings, is unequalled.

The University consists of 20 Colleges and 5 Halls.—I. Baliol College, founded in 1269, by Sir John Baliol,

of Bernard Castle, Father of John Baliol, King of Scotland; mostly rebuilt in the Reigns of Henry VI. and VII. It consists of a Master, 12 Fellows, 14 Scholars, and 13 Exhibitioners. The Entrance into the Court is by a handsome Gothic Gateway, on the north Side of which stands the Chapel, adorned with many beautiful Paintings on Glass; and a new Building has of late been added to the south-west Angle, through the Munificence of the Rev. Wm. Fisher, late Fellow of this College.

II. Merton College, erected in 1267, by Walter de Merton, Bishop of Rochester and Lord Chancellor of England, being transferred from the College at Merton, in Surrey; it consists of a Warden, 24 Fellows, and 14 Postmasters. The Chapel, which is also the Parish Church of St. John's, is a handsome Gothic Edifice. South of this Chapel is a small old Quadrangle, Part of which forms the Library, and contains many curious Manuscripts.

III. University College. This is supposed to have been the principal College or Hall founded by Alfred; but was chiefly restored by William, Archdeacon of Durham, who left a considerable Legacy thereto in 1249; as well as by the Contribution of Walter Shirlaw, Bishop of Durham, and Hen. Percy, Earl of Northumberland: it consists now of a Master, 12 Fellows, and 17 Scholars. It has been greatly enlarged by the Benefaction of Dr. John Radcliff, and has Chambers for 2 Fellows, Students in Medicine, who have a handsome Salary for ten Years; Half of which Time they are to travel beyond Seas for Improvement. In the common Room is a Marble Bust of K. Alfred, by Wilton, reckoned one of the best Pieces of modern Sculpture in the University.

IV. Exeter College, founded, in 1314, by Walter Stapledon, Bishop of Exeter: it consists of a Rector, 25 Fellows, 1 Scholar, and 2 Exhibitioners, principally elected out of the Diocese of Exeter.

V. Oriel College, founded, in 1324, by Adam de Brome, Almoner to Ed-

ward III.: a Tenement, called L'Orielle, or Le Orielle, was given to it by Edward III. from whence it is supposed to have taken its Name. It maintains a Provost, 18 Fellows, and 13 Exhibitioners, and the whole Number of Students is about 140.

VI. Queen's College, founded, in 1340, by Robert de Eglesfield, Chaplain to Queen Philippa, Consort of Edward III. The present Edifice was begun in 1672, by Sir Joseph Williamson, Knt. and finished by the handsome Legacy of Mr. Mitchell, of Richmond, who founded 8 additional Fellowships, 4 Scholarships, and 4 Exhibitions, in this College: the Members are, a Provost, 24 Fellows, &c. and the whole Number of Students amounts to about 100.

VII. New College, or Winchester College, was founded, in 1379, by the great Wm. of Wykeham, and endowed for a Warden and 70 Fellows. The Chapel of this College is far superior to any other in the University. The Antechamber is supported by two Pillars of fine Proportions. The Entrance to the Choir is by a beautiful Gothic Screen, 100 Feet long, 35 broad, and 65 high. The Approach to the Altar is by a noble Flight of Marble Steps. The Communion Table is enclosed by a handsome Iron Rail-work, and covered with a Pall of Crimson Velvet. The Stalls are remarkably elegant, in the light Gothic Style. The Windows of the Antechapel contain the Portraits of the Patriarchs, Prophets, and Saints, as large as Life, to the Number of 64, and 50 smaller above them. The west Window is divided into two Ranges; the lower having seven Compartments, each near 3 Feet wide and 12 high, with Representations of Temperance, Fortitude, Faith, Hope, Justice, Prudence, and Charity; over them, in a Space 10 Feet wide and 18 high, is represented the Nativity of our Saviour; and the Portraits of the two Artists, Sir Joshua Reynolds and Mr. Jarvis, are introduced as Shepherds paying Adoration to the newborn Infant. The Windows on the north Side of the Chapel contain, in

the lower Range, the chief Persons recorded in the Old Testament; and, in the upper, the 12 Apostles. The two other Windows are filled with Pictures of our Saviour, the Virgin Mary, and the 12 Apostles. The Windows on the south Side of the Chapel, representing various Saints and Martyrs, were painted by Price, in 1740. In this Chapel is shown the Crosier of the Founder, almost the only one of the Kind remaining in the Kingdom: it is of Silver, gilt, near 7 Feet high, ornamented with Figures of Angels, and the tutelar Saints of the Cathedral of Winchester.

VIII. Trinity College was founded by Sir Tho. Pope, in 1594, on the Site of a College erected by the Prior and Monks of Durham. It consists of a President, 12 Fellows, and 12 Scholars. Dr. Bathurst, President of this College, rebuilt the beautiful Chapel, in 1694; and it contains an excellent Library.

IX. Lincoln College, founded by Richard Fleming, Bishop of Lincoln, who obtained a License of Henry VI. in 1427, to make All Saints Church collegiate, and to found a College for a Rector and 7 Scholars; it was finished in 1475, by Rotherham, Bishop of Lincoln, afterwards Archbishop of York, and now consists of a Rector, 12 Fellows, &c. The Chapel was erected in 1632; the Windows are of painted Glass. The Roof consists of Compartments of Cedar, embellished with the Arms of the different Founders. There are 8 Figures of Cedar representing Moses, Aaron, the four Evangelists, St. Peter, and St. Paul, placed at each End of the Reading Desk.

X. Worcester College, founded in 1714, by Sir Thos. Coke, of Bentley, in Worcestershire, consists of a Provost, 20 Fellows, 17 Scholars, &c. It was originally called Gloucester College, being a Seminary for educating the Novices of Gloucester Monastery; and, at the Reformation, was converted into a Palace for the Bishop of Oxford.

XI. St. John's College was found-

ed, 1557, by Sir Thos. White, Alderman of London, on the Site of Saint Bernard's College, for a President, 50 Fellows, 2 Chaplains, 2 Clerks, 6 Choristers, &c. It consists of two Courts: in the first are the Chapel and Hall on the North, and the President's Chambers on the East. The Chapel has a handsome Screen and Altar, and over the Communion Table is a beautiful Piece of Tapestry. The Choir Service is here performed in the Evening only. On the north Wall of this Chapel is a Marble Urn, containing the Heart of Dr. Rawlinson, enclosed in a Silver Vessel. On the east and the west Side of the second Court is a beautiful Doric Colonnade, the Columns being made of a remarkable Stone, said to be dug at Fifield, in Berks; in the Centre of each are Porticoes, having a Profusion of Embellishments; over these, on each Side, are two good Statues, in Brass, of Charles I. and his Queen. The upper Stories of the south and east Side form the Library, the Window of which has several curious Paintings in Glass. The second Court was mostly erected by Dr. (afterwards Archbishop) Laud, in 1595, from the Materials of a Carmelite Friary on Gloucester Green.

XII. All Souls College, founded in 1438, by Hen. Chicheley, Archbishop of Canterbury, for a Warden and 40 Fellows, besides 2 Chaplains, 9 Clerks, and Choristers. The Chapel is a stately Pile, and the Antechapel, containing several remarkable Monuments, is 70 Feet long and 30 broad. The Entrance to the inner Chapel is by a grand Flight of Marble Steps, through a Screen constructed by Sir Christopher Wren. On each Side of the Altar are two Vases, representing, in Bas Relief, the Institution of the two Sacraments. Between the Windows are various Saints, in Chiaro Scuro; and it has a noble Library. There is a curious Ceremony performed at this College annually, on the 14th of January, called "The Mallard Night," being the

Commemoration of the Discovery of a Mallard of extraordinary Size, in a Drain, when digging the Foundation. An elegant Entertainment is provided in the Evening, and a merry old Song is always sung, set to ancient Music.

XIII. Magdalen College, founded, in 1458, by William of Wainfleet, Bishop of Winchester, for a President, 40 Fellows, 30 Scholars, &c. It is adorned with the Figures of the Founder, William of Wykeham, St. Mary Magdalen, Henry III. and St. John the Baptist. In the west Window of the Antechapel are some Remains of painted Glass, and the Windows of the Chapel contain the Representation of Apostles, Saints, &c. The Altar-piece is a beautiful Representation of the Last Judgment; and, underneath, a Painting, supposed to be by Guido, of Christ bearing the Cross. Through the Centre of the Building is the Entrance to a beautiful Lawn.

XIV. Brazen Nose College, founded, in 1509, by Wm Smith, Bishop of Lincoln, and Rich. Suttow, Knt. of Prestbury, in Cheshire, for a Principal and 15 Fellows. The present Establishment is 5 Fellows, 32 Scholars, and 12 Exhibitioners. In the Centre of the first Quadrangle are Statues of Cain and Abel. The east Window of the Chapel contains some good painted Glass, by Pearson.

XV. Corpus Christi College, founded, in 1516, by Bishop Fox, Lord Privy Seal to Henry VII. and VIII. It has a well-furnished Library, and a curious Collection of Pamphlets, Manuscripts, &c. The Crozier of the Founder is here shown; but it is not so curious as that of Wykeham, at New College. The present Members of this Society are a President, 20 Fellows, 2 Chaplains, 20 Scholars, 4 Exhibitioners, and 6 Gentlemen Commoners.

XVI. Christchurch, founded by Cardinal Wolsey, in 1525; but, in 1549, when he fell into Disgrace, Henry VIII. seized on the Foundation, and suspended it for three Years, when he re-established it under his

own Name, and in 1546 translated the episcopal See hither from Oseney; and the Church of St. Frideswide was constituted a Cathedral, by the Name of Christ's Church. This Foundation has remained in the same Form ever since, except that Queen Elizabeth converted the Grammar Scholars into Students, and ordained that their Vacancies should be supplied from Westminster School. It consists of a Dean, 8 Canons, 100 Students, 8 Chaplains, 8 Singing Men, 8 Choristers, a Schoolmaster, Organist, &c. The Building contains 4 Quadrangles, the Front extending 382 Feet, and terminates at each End with two corresponding Turrets; in the Centre is the grand Entrance, a most magnificent Gothic Building, having a beautiful Tower, which contains the Bell called Great Tom, on the Sound of which, every Night at Nine, the Students of the University are enjoined by Statute to repair to their respective Societies. The grand Quadrangle is 264 Feet by 261 in the Clear, the east and north Sides of which contain the Chambers of the Dean and 4 of the Canons; and the greater Part of the south Side is formed by the Hall, the Entrance to which, by a stately Staircase of Stone, is 180 Feet in Length, and 80 high. It is ornamented with the Portraits of most of the eminent Men who have been educated at this College. The Roof is a noble Frame of Rafter-work, beautified with about 300 Coats of Arms, properly blazoned. Round the whole Area of the grand Quadrangle is a spacious Terrace, and in the Centre a Basin and Fountain, with a Statue of Mercury. Over the grand Entrance is a Statue of Queen Anne; over the Arch in the N. E. Angle, one of Bishop Fell; and opposite, on the S. E. one of Cardinal Wolsey. The Church towards the East of the grand Quadrangle is the Cathedral, formerly the Church of St. Frideswide's Monastery, erected in 1200, on the Site of which Monastery the College was built: several of the Windows contain beautiful Specimens of painted

Glass, which were collected from the Wreck of the Civil Wars. At the west End of the north Aisle is the Painting of St. Peter delivered out of Prison, executed in 1720, by John Oliver, in his 80th Year. The Tower contains ten Bells, which, together with that called Great Tom, were brought from Oseney Abbey. Peckwater Court, founded by Dr. Radcliffe, consists of three uniform Sides, each having 15 Windows in Front, and is perhaps the most elegant Edifice in the University. On the front Side of this Court is a magnificent Library, supported by Corinthian Pillars; but what was originally intended to be a Piazza, has been altered, for the more convenient Reception of Gen. Guise's Collection of Paintings, and the great Collection of Books belonging to the College. East of this stands Canterbury Court, formerly a distinct College, which has lately been handsomely rebuilt.

XVII. Jesus College, founded, in 1571, by Queen Elizabeth; and endowed by Hugh Price, Treasurer of St. David's, for a Principal, 8 Fellows, and 8 Scholars; which has since been raised to 19 Fellows and 18 Scholars, besides Exhibitioners.

XVIII. Wadham College, founded in 1613, according to the Will of Nicholas Wadham, of Merryfield, in Somerset, for a Warden, 15 Fellows, 15 Scholars, 2 Chaplains, and 2 Clerks. In the east Window of the Chapel is a fine Painting of the Passion of our Saviour; and at the lower Part of the Altar is a singular and curious Painting on Cloth.

XIX. Pembroke College, founded, in 1620, by Tho. Tesdale, of Glympton, in Oxfordshire; and Rich. Wightwick, Rector of Ilsley, Berks. It was originally Broadgate Hall, and received its present Name from the Earl of Pembroke, who was Chancellor of the University at the Time the College was founded.

XX. Hertford College. This is now dissolved by Act of Parliament, and the Building transferred for the future Occupation of the Society of

Magdalen Hall, which is to be pulled down.

Halls. I. Alban Hall is contiguous to Merton College, erected by Robt. de St. Alban, a Citizen of Oxford.

II. St. Edmund's Hall, situate to the East of Queen's College, established in the Reign of Edward III. and consigned to Queen's College in 1557.

III. St. Mary Hall, originally the Parsonage-house of the Rectors of St. Mary, which being appropriated by Edward III. to Oriel College, the House also came into their Possession.

IV. New Inn Hall was granted to Students by John Frillock, Bishop of Hereford, in 1545.

V. Magdalen Hall, situate west of Magdalen College: the greater Part of it is the Grammar School for the Choristers of Magdalen College, and was erected for that Purpose only by William of Wainfleet; but, other Buildings being added, it grew by Degrees into an academical Hall.

Among the other public Buildings worthy of Notice are the following Churches—All Saints, St. Peter's, and St. Mary's. The other public Buildings are—the Theatre, which was built at the Expense of Archbishop Sheldon, in 1668, and is a magnificent Edifice, in the Form of a Roman Theatre, not circular, but flat on one Side; and the Roof, 90 Feet by 70, rests on the Walls, without Pillars. Ashmole's Museum, a Repository of natural and artificial Curiosities; the Clarendon Printing-house; Bodleian Library; Radcliffe Library; and the Astronomical Observatory.

The City and University send each 2 Members to Parliament. The University is governed by a Chancellor, Vice-chancellor, 2 Proctors, a Public Orator, 3 Esquire Beadles, and 3 Yeoman Beadles.

The Corporation of Oxford consists of a Mayor, High Steward, Recorder, 4 Aldermen, 8 Assistants, 2 Bailiffs, a Town Clerk, 2 Chamberlains, and 24 Common Councilmen.

CROSS ROADS.

The Course of the Rivers and navigable Canals, the Population and Number of Houses in the Market Towns, with the Arrival and Departure of the Mail, &c. having been already given in the DIRECT ROADS, it is judged unnecessary to repeat them here. Those Places which supply Post Horses are noticed at the End of each Route, and the Names of the Inns will be seen by referring to the same Places on the Direct Roads from London.
